

**TTS Terminals, Inc.** is a service provider to the transportation industry for more than 25 years working with **railroads, steam ship lines, trucking companies** and **intermodal business.**

## *Intermodal Equipment Review*

The Intermodal Review Process accomplishes the following:

- ◇ Reduces/eliminates driver delay time at roadability/flip line
- ◇ Provides a measurement tool of IEP/Rail/ Vendor
- ◇ Provides a retention tool for drivers and owner operators
- ◇ Provides a recruitment tool for drivers and owner operators
- ◇ Adds to driver productivity
- ◇ Boosts visibility of out of service violations
- ◇ Creates driver & equipment safety awareness
- ◇ Provides documentation of maintenance & compliance
- ◇ Enhances the ability to accurately determine resource needs
- ◇ Increases asset utilization through advanced warning of potential delays
- ◇ Improves customer on time service objectives

## *Intermodal Equipment Review*

The Intermodal Equipment Review (IER) process provides validation of the availability of loads notified for pick up. The inspection, though it does not take the place of the DOT mandated pre-trip inspection performed by the driver, is designed to quickly determine the status of the designated equipment and offer repair options. For example:

Reporting Status	Defined As	Equipment Condition
Available	=	No defects identified
Defects	=	Vehicle issues identified that are available for roadability lane repair or outside vendor repair
Dispatch	=	Shipper/IEP approved vendor notified to complete repair
Flip	=	Mis-mounted or gross defect

Items inspected include but are not limited to:

Pins, Lights, Legs, Crank, Tires (Visual), FHWA, Container, Seal, Air Lines, Chassis Stencil
